GAME CONSTRUCTION & HOW TO SAVE

SKIES of ARCADIA is a game with skies and floating islands as its main stage. Vyse, the main character, soars the skies with his aerial ship, explores the villages and dungeons on foot, and engages in battles. Here is the basic flow of the game.

RELATIONSHIP BETWEEN EACH MODE

VILLAGES & DUNGEONS

In villages, buildings, and dungeons, Vyse walks around on foot to explore and talk with other characters (p.11).

SKIES

This is where Vyse travels aboard the ship. Depending on the size of the ship and the performance of the engine, the area Vyse can explore widens (p.8).

BATTLE MODES

While exploring the dungeons or traveling aboard the ship, if Vyse encounters enemies, a battle begins. There are two types of battles: normal battles and ship battles (p.15).

TRANSFERRING BETWEEN VILLAGES/DUNGEONS AND SKY

FROM THE SKY TO THE VILLAGES/DUNGEONS

Approach the island or building with your ship, and press **A**. If it is an island you can land on, you will be transferred to the field within.

FROM THE VILLAGES/DUNGEONS TO THE SKY

If you are transferring from the the village or dungeon to the sky, approach the ship you will be boarding, and press **A**. A message appears to confirm that you wish to return to your ship. Use **↑↓** to choose your selection, and press **A** to enter.

GAME OVER

The game is over when the HPs of all characters in the party or the HP of the ship drop to zero, and returns to the title screen. On battles against bosses, however, you will be asked whether to continue the game or not. Use **↑↓** to select "I never give up" or "I quit," and press **A**.

GAME CONSTRUCTION & HOW TO SAVE

HOW TO SAVE

In the villages/dungeons and the dungeons for the ship, you may save your progress only at the save points. Approach the save point, and press **A** to switch to the Save screen. During normal travel in the sky, you may save anywhere. Press the Start Button to open the menu, and select "SAVE" to switch to the Save screen.

SAVE FILE SELECTION

Next, use **↑↓** to select the file to save game, and press **A** to enter. You will be confirmed whether to save on this file, or to overwrite if the previous data is present (the previous data will be erased if overwritten). Use **↑↓** to select YES/NO, and press **A** to enter. If 27 blocks of free memory are not available, you will not be able to select a file.

WHEN THERE IS NO SAVE FILE ON THE MEMORY CARD

In case there is no save file for SKIES of ARCADIA on the memory card, when that memory card is selected, the game will create a file automatically. At this point, the game will ask whether to change the icon on the VMU to that of SKIES of ARCADIA. Use **↑↓** to select YES/NO, and press **A** to enter. To save icon data, 2 blocks of free memory are needed.

SKIES (TRAVELING BY SHIP)

You can talk to the Guildmaster for information regarding the Guild.

LEAVE

Leave the Guild.

GROWTH OF CUPIL, AND CHAMS

The mysterious creature "Cupil," Fina's friend, grows by eating a special food (item) called "Cham." When it grows, it can change itself into various forms. When you approach the location where a Cham is, Cupil reacts to let you know. Press **A**, when Cupil reacts to a Cham, to examine the area. When Cupil reacts, it will let you know in the following manners (p.32):

- When VMU sound is enabled, it will beep.
- Cupil's appearance on VMU screen changes.
- When the Jump Pack is attached and vibration is enabled, it will vibrate.

ABOUT THE SWASHBUCKLER RATING

Depending on the events and selection of your replies in conversations, the value of Vyse's Swashbuckler rating changes. If you make the correct decisions and perform brave actions, the value rises, and people's attitudes towards Vyse will change. If you have a high Swashbuckler rating, people will trust you, and they will be easier to deal with. When there is a change in the Swashbuckler rating, a chime will ring to indicate whether it has risen or fallen. You can get an idea as to how high your Swashbuckler rating is by going to Vyse's Character Status screen in the Status Menu (p.27) and finding out what Vyse's title is.

BASE SYSTEM AND CREW SYSTEM

Sometime in the adventure, Vyse will obtain his own ship. At that time, apart from party members such as Aika and Fina, you can obtain crew members. Also, he will establish his own base, as in Dyne's Pirate Isle.

ABOUT BASE SYSTEM

When there is a Builder, you can invest money to have him improve the base. This is called the Base System. You can change the appearance of structures as well as their functions. Also, by bringing new crew members, new buildings can be built, making your base a more lively place.

ABOUT CREW SYSTEM

When Vyse obtains his own ship, he can scout for crew members to bring aboard. Depending on the crew members' abilities, the ship powers up accordingly. For example, if you have a Gunner aboard, the ship's bombing ability will increase. Also, while in a ship battle, you can select the "Crew Command" to have him/her do his/her work. The possible crew members are scattered throughout the world. But not all will join easily, as some will require special conditions. Whether he/she will join as crew member is up to Vyse.

BATTLE MODES

There are two different battle modes: a Normal Battle, where party members and enemies battle on one field; and a Ship Battle, where your ship battles against the enemy ship. On each turn, you will give commands to each character. When the HP of the character drops to zero, he/she will become unconscious, but he/she will regain one HP after the battle (only in Normal Battle). If the HPs of all characters in your party or the ship's HP drops to zero, the game will be over. (In battles against a boss character, you can continue the game.)

NORMAL BATTLE

NORMAL BATTLE DISPLAY

1 SPIRIT POINTS GAUGE (SP)

It is the value of actions your party can take as a whole. It will be consumed when magic and Super Moves are used. It is displayed as current value/maximum value. The green gauge indicates the amount you can spend, and the red indicates the amount you have already assigned. After each turn, the amount increases according to the number of characters that can take action. Also, on command selection, select "FOCUS" to increase this amount. After each battle, the value returns to the amount at the beginning of the battle.

2 CHARACTER'S FACE AND NAME

The color of the rim displaying the character's face indicates the current color weapon equipped (p.19).

3 LEVEL

Indicates the current level of that character.

4 MP (MAGIC POINTS)

Indicates the number of magic points you can use. The values indicate the current/ maximum value. If you use magic, the value decreases by one.

5 HP (HIT POINTS)

Indicates the physical strength of the character. The values indicate the current/maximum value. When the value drops to zero, that character will not be able to fight.

6 CONDITION

If there is a temporary status change (such as a rise in attributes, or adverse effects like Poison, etc.), icons will be displayed here.

7 BATTLE COMMAND

See description below.

BATTLE COMMAND

On each turn, you will select each character's action, starting with Vyse. Use $\uparrow\downarrow\leftarrow\rightarrow$ to select a command, and press \triangle to enter (some commands may not be selectable, depending on conditions). Press \square to cancel. To change the color of the weapon equipped, press ψ (on each press, depending on Moon Stones you already have, the color changes in following order: green>red>purple>blue>yellow>silver.) Press \otimes to display the status of the party (press again to close). Also, press \otimes while selecting item or magic to display its description (press \otimes again to close).

- RUN** Escape from the battle (cannot be selected against the bosses.)
- ITEM** Use item.
- GUARD** Guard against enemy attack.
- ATTACK** Attack with equipped weapon.
- S-MOVE** Use the character's Super Move.
- MAGIC** Use magic.

Next, use $\uparrow\downarrow$ to select the item (use $\leftarrow\rightarrow$ to change list), and press \triangle . Finally, use $\uparrow\downarrow$ to select the target character to use item on, and press \triangle (unless the item affects everyone). You can also change equipment. Note that changing weapons will not spend your turn.

GUARD

ATTACK

Attack with equipped weapon. When selected, a cursor will appear on the enemy to attack. Use $\uparrow\downarrow$ to select the enemy, and press \triangle to enter. Also, depending on color (attribute) of the weapon, the damages to the enemy may differ (p.19).

S-MOVE

Use the Super Move the characters learned. Select "S-move," use $\uparrow\downarrow$ to select the Super Move, and press \triangle to enter. While selecting the Super Move, press \otimes to display its description. Depending on Super Move, the value consuming SP differs (p.18). If the character has not learned any Super Moves, this cannot be selected.

Spends given amount of Spirit Points (SP).

MAGIC

Spends given amount of SP/spends 1 MP per use.

Use the magic the character has learned. On each use, 1 MP is used. Use **↑↓←→** to select the magic, and press **A** to enter. While selecting the magic, press **X** to display its description.

FOCUS

Increase the amount of Spirit Points. The amount depends on the Spirit rating of the character using this command.

END OF THE BATTLE

When the party wins the battle, the result screen will be displayed. The amount of experience points, gold, and magic experience points (with respect to the color of weapon used) will be calculated and added. When a character's experience points or magic experience points reach a given level, his/her experience level/magic experience rank will increase. When a particular magic color ranks up, a new spell for that attribute of magic experience will be learned (p.19). To end the result screen, press **A**.

The contents of the result screens are the same for both normal and ship battles.

Item	Exp.	0	Magic Exp.	1	Exp.
Viper	Lv12	Total Exp.	Next	1000	1000
Aika	Lv12	Total Exp.	Next	1000	1000
Fila	Lv9	Total Exp.	Next	1000	1000
Radha	Lv14	Total Exp.	Next	1000	1000

SPIRIT SYSTEM

Spirit points, or SP, is the value of actions your party can take as a whole, and is displayed as a green gauge at the top of the Battle screens. On normal battles, it will be consumed when using magic or Super Moves. During Ship Battles, it will be consumed on all commands except Run, Guard, Focus, and Item. The stronger the magic or the Super Move, the more SP the action will consume. You will gain a given amount of SP on every turn, but you can gain additional SP with the "Focus" command. Since this value is shared among the party, it is possible to make one of your party gain SP while the others use the magic/super move to consume it. The battle condition may change according to how you use this. Use it effectively.

CHANGING COLOR (ATTRIBUTE) OF WEAPON & LEARNING MAGIC

There are 6 colors of Moon Stones: green, red, purple, blue, yellow, and silver. And each has different attributes. According to the colors of Moon Stones you have, you can change the color of weapons. By changing colors, the attributes change according to the colors. To change color, press **Y** while selecting your action on battle. You may change the color from the "Item" command as well. Select the "Item" command, then use **←→** to select "Weapons." Next, use **↑↓** to select the weapon, and press **A** to open the Moon Stone window. Use **←→** to select color, and press **A** to enter.

The enemies also have attributes, and attack by using these attributes. Also, if you attack with the color of attribute that stands against the enemy's, you can give great damage to the enemy (see chart below). At the end of battle, Magic Experience points for the color of weapon used will be given. When the Magic Experience points reach certain amounts, the character will learn new magic, in compliance with that attribute. Characters earn double the amount of Magic Experience in the color that they have equipped, and equal amounts in the color(s) that other party members have equipped.

GREEN	>	RED		PURPLE	>	GREEN
RED	<<>>	PURPLE		BLUE	>	YELLOW
RED	>	BLUE		YELLOW	>>	GREEN
BLUE	>	PURPLE		YELLOW	<<	SILVER

">>" indicates that the damage is larger than ">"

LEARNING SUPER MOVES

The characters learn new Super Moves by consuming items called "Moonberries." To learn a new Super Move, select "Super Move" command on Character Status screen of Status Menu (p.29). The order of Super Moves the characters can learn is fixed. Also, the amount of Moonberries needed depends on each Super Move.

ABOUT THE CHANGE IN STATE

During the battle, if the color of the name of friend/enemy on Status screen changes, it indicates that the state of the character has changed in various ways.

Red-Purple	Guarding.
Yellow-Green	Nullify Attack is in effect.
Yellow	Nullify State Change from magic or attack.
Blue	Nullify Stage Change.
RP+YG+Y+B	Nullify all attack from the enemy.

Also, when the state changes due to poison, etc., the following icons will also be displayed on Status screen.

6 BATTLE GRID (P.24)

SHIP BATTLE COMMAND

When the player's turn arrives, you will be asked to enter commands for each character, starting with Vyse. Use to select Ship Battle Command, and press to enter. (There are some commands you cannot give.) Press to cancel. Designate the commands to Battle Grid, and the ship battle begins. Upon selecting "Item" or "Magic," press to display explanation (Press again to close).

- RUN** Escape from the battle (cannot be selected against bosses.)
- ITEM** Use item.
- GUARD** Guard against the enemy attack.
- ATTACK** Attack with equipped weapon.
- MAGIC** Use magic or fire Magic Cannon.
- FOCUS** Increase SP.
- S-CANNON** Fire special cannon.
- CREW** Command which can be used after Vyse becomes the captain of his own ship.

RUN

Escape from the battle. Its use is the same as in normal battle (p.17).

ITEM

Use the selected item. Its use is the same as in normal battle (p.17).

GUARD

Take evasive maneuvers, lessening the damage taken from enemy attacks.

ATTACK

Fire cannons. Select "Attack," use to select cannon the ship is equipped with, and press to enter. There are three types of weapons, and their features are different (p.25). Consumes given amount of SP.

MAGIC

Use magic. 1 MP is spent for each use. The method of selecting is the same as in normal battle (p.18). Also, the magically-charged cannonballs the character fires against the enemy are treated the same as normal cannon fire, as you may at times miss. Note that you will need to obtain the "Magic Cannon" in order to be able to fire magic. Consumes given amount of SP/1 MP per use.

FOCUS

Regains given amount of SP.

S-CANNON

Some of your ships may be equipped with Special Cannons. You can only use these in areas indicated with a special icon. A great amount of SP will be consumed, but the cannon will fire a shot with enormous power. By using this, the flow of the battle may change. Consumes necessary amount of SP.

CREW

Consumes necessary amount of SP.

When Vyse owns his ship, he will be able to give orders to the crew aboard his ship. Select "Crew," use $\uparrow\downarrow$ to select the crew member, and press \triangle to enter. Each crew member has his/her different abilities, such as restoring SP or repairing the ship (recovering ship's HP). Also, the amount of SP used varies with different crews. With their abilities in mind, you can turn the Ship Battle to your advantage, or even improve the abilities of the ship.

SHIP BATTLE SCREEN

During each turn of a ship battle, each member of your party can take a single action. Depending on how many characters you have in your party, each turn will be broken up into a number of rounds. So, with four members in the party, each turn will be broken up into four rounds. Upon selecting an action for each character, an icon designating that action will appear at the top of the screen on the "Battle Grid."

HOW TO INPUT COMMANDS USING THE BATTLE GRID

You will need to select a Command (p.22) for each character in your party. However, as stated above, each character can only perform one action per turn.

Use $\uparrow\downarrow\leftarrow\rightarrow$ to select a Command, and press \triangle to enter. An icon showing the action that you chose will be displayed on the Battle Grid. Next, use $\leftarrow\rightarrow$ to select the round in which you would like the character to perform that action, and press \triangle to enter. Pressing \ominus will cancel your selection.

ACTION ROUNDS FOR ATTACK

There are three types of artilleries you can use to attack by ship, and their features are different. With main and secondary cannons, if your position against the enemy ship is not correct, you may not be able to have the enemy in the correct angle to fire. Your shot will be lost in this case. Also, depending on the accuracy of the cannon, you may miss at times.

MAIN CANNON

Fires and hits on same round. Has power, but consumes more SP.

SECONDARY CANNON

With additional consumption of SP, you can fire in successive rounds.

TORPEDO

You may designate the round to fire and the round to hit.
